01 / A SIMPLE TABLETOP SIGNAL

One flip. A visible request.

Green means normal dining with no service needed. Flip to red to request attention from staff.

GREEN: NO SERVICE NEEDED

RED: SERVICE REQUEST

A visual cue on the table.

No phone, pager, POS integration or table-number notification is implied.

02 / TWO COLORS, A CLEAR MESSAGE

Green to enjoy. Red for service.

A simple visual language for restaurants, hotels and cafes. Green means guests do not need service. Red means guests are requesting service.

A SIMPLE SERVICE ROUTINE

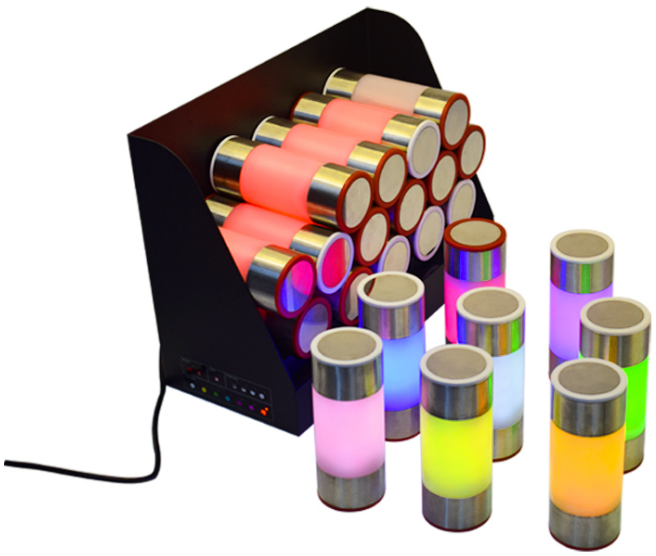

Keep the lamp green while dining. Flip to red when assistance is needed. Staff respond to the visible light on the table.

Color appearance varies with settings and ambient light. AI application image.

03 / A SHARED CHARGING WORKFLOW

Reset for the next service.

Place lamps onto the matching charging base instead of connecting an individual cable to every lamp.

25
Lamps, matching setup

120 W
Specified adapter

EU / US / UK
Plug options

Up to 25 lamps with the matching 25-lamp charging configuration and 12 V / 10 A adapter. The pictured rack illustrates the charging method; confirm the complete rack configuration and included accessories in your quotation.

04 / MADE FOR HOSPITALITY SPACES

From table lighting to attentive service.
